

# ENVIRONMENTAL POLICY STATEMENT

Access Boring is dedicated to providing the highest level of service and excellence in civil construction and associated project management & development services.

Access Boring will take a positive, objective and responsible attitude to protecting the environment and minimising the effects on the public by:

- Striving to eliminate or minimise damage to the environment through project and financial planning and sound decision-making processes.
- Endeavouring to make sustainable use of renewable resources and to minimise the waste of non-renewable resources.
- Consulting with affected stakeholders and communities
- Reducing or recycling as much waste as practicable.
- Comply with all Local, State & Federal legislation, environmental regulations and requirements
- Ensuring management and employees receive information and training on effective environmental management practice.
- Conducting regular environmental audits to ensure the systems are working.

All Environmental Management Plans will consist of this Policy Statement and the relevant element/s of risk

We are also committed to purchase and use materials, substances and equipment that are environmentally friendly and minimises environmental impacts and pollution in accordance with ISO 14001:2015

In our offices we are committed to recycling of materials and substances and aim to increase the portion of recycling each year.

To ensure the achievements of the above objectives, we remain committed to continually improve our service and processes through the establishment of measurable environmental objectives with set targets and the collection and analysis of data for these objectives to determine areas for taking preventative actions to for improvement.

The company has a committed to continually improve the effectiveness of the environmental management system.

Our aim is to set BEST PRACTICE standards for the industry and be regarded as a leader.
